- Very helpful about pointing out our errors and getting us to figure them out and fix them on our own.

- Mark was very helpful in lab section. His way of going around answering questions is effective because he does not get to other people before someone who has been waiting longer. Whenever my lab was working properly, Mark was willing to look over my blocks and telling me what I was doing wrong.

- He's very helpful and is willing to work with students. Genuinely cares about his students and is willing to stay over time to get them the help they need.

- Nice and understanding
