UC RIVERSIDE - Student Comments of Instructor, Laboratory Courses - Fall 2017

Course: CS 122A Section: 022 - INT EMBEDDED&REAL-TIME SYSTEMS
Instructor: Mark Asfour

Question # 20: YOUR CONSTRUCTIVE COMMENTS ON YOUR GRADUATE STUDENT INSTRUCTOR'S TEACHING SKILLS ARE EXTREMELY IMPORTANT. PLEASE WRITE YOUR COMMENTS IN THE TEXTBOX BELOW. PLEASE LIMIT YOUR COMMENTS TO 2000 CHARACTERS.

- Mark is a cool guy. It's not really his fault this course is structured the way it is. It's just a self-learning kind of class and you ask for help when you have a bug or something. He definitely knows the material really well and is able to help with just about anything I asked. Office hours times kinda sucked: 8 AM on Friday's. Yeah that's not happening.

- Mark was the best Lab leader I have had. His method of explaining labs and helping students truly displayed a high level of enthusiasm and professionalism which has been polar opposite to many others in BCOE.

- You a real one Mark

- Great TA, thanks for everything. Xhoni

- Wonderful TA. Was very helpful during lab and kept the atmosphere fun and entertaining. I liked how he would sit and talk with us about engineering in general while we were working on labs and how he gave us advice on professional development. Overall a great person and great educator.

- Overall, a great TA. Extremely helpful when asked questions, and checks on people to see how they're doing if they aren't done with the lab.

- Overall, definitely one of the best CS TAs I have had at UCR. He seemed pretty chill and knowledgeable. Very willing to help you out with your problems. A+ 10/10

- Mark is one of the coolest TA's I had. Mark isn't afraid to sit down and go through your logic and code in order to find your error. During this quarter I felt open to ask questions about my code or with any state machine logic. He is very approachable and is willing to spend the time to work with the student to find a solution.
